## Applications:

\$ Domacryl $076945 \mathrm{Wa} / \mathrm{BG} / \mathrm{SA}$ intended to be used as polyol component in 2K PUR aqueous clear and top coats for wood, plastic and metal surfaces.
Excellent applicability, resistance and appearance are achieved in combination with wateremulsifiable polyisocyanates, for example hydrophilically modified HDI-based polyisocyanates (Bayhydur XP 2487/1).
\# For proper emulsification and film formation a cosolvent such as MPA or Proglyde DMM must be used in formulation. Starting coating formulation available upon request.

## Storage:

The resin should be stored indoors in its original, unopened and undamaged container in a dry place at storage temperatures between $5^{\circ} \mathrm{C}$ and $35^{\circ} \mathrm{C}$, for up to 6 months. Protect from freezing and avoid exposure to direct sunlight.
