## DOMACRYL 922

Methacrylate Resin

## Specification:

| Property | Range | Method / According to standard |
| :--- | :--- | :--- |
| Viscosity, $23^{\circ} \mathrm{C}$ | $100-130 \mathrm{mPa} \cdot \mathrm{s}$ | MH1007 / ISO 3219 |

## Typical properties:

| Property | Value |
| :--- | :--- |
| Appearance | Bluish opaque liquid |
| Refractive index | 1.44 |

## Remarks:

\$ Low viscosity, methacrylate resin, used for permanent cold spray plastic road markings used in combination with the pre-accelerated Domacryl 920.
$\$$ Markings based on Domacryl 922 are permanently elastic, weather resistant and resistant to abrasion, road salts and fuels.
\$ Domacryl 922 contains paraffin which tends to float when stored for a long period of time at lower temperatures. Therefore, the binder must be homogenized before use by stirring.
$\$$ Domacryl 922 is not amine pre-activated.

## Applications:

\$ Binder for cold spray plastic road markings, hardened with dibenzoyl peroxide.
$\$$ Particularly suitable for automatic machines (1:1 systems) with Domacryl 920.
$\geqslant$ Recommended layer thickness is $0.4-0.8 \mathrm{~mm}$.
\$Recommended application temperature is between 5 and $40^{\circ} \mathrm{C}$.
\$ Domacryl 922 has a mild odour.

## Storage:

The resin should be stored indoors in its original, unopened and undamaged container in a dry place at storage temperatures between $5{ }^{\circ} \mathrm{C}$ and $25^{\circ} \mathrm{C}$, for up to 6 months. Exposure to direct sunlight should be avoided.
